

# FTSE MIB INDEX

The FTSE MIB Index is the primary benchmark index for the Italian equity market. Capturing approximately 80% of the domestic market capitalisation, the FTSE MIB Index measures the performance of the 40 most liquid and capitalised Italian shares and seeks to replicate the broad sector weights of the Italian stock market. The index is derived from the universe of stocks trading on Borsa Italiana's (Bit) MTA market, and has been created to be used as a basis for the creation of ETFs, tracker funds, derivatives and structured products.

## FEATURES

- The FTSE MIB Index consists of the 40 most liquid and capitalised stocks selected by FTSE Italia Joint Executive Group that are listed on Borsa Italiana's (Bit) MTA market
- The index is capped at 15%, and is the large cap component of the FTSE Italia All-Share Index, which covers 95% of the domestic market
- Foreign shares are eligible for inclusion though secondary lines are excluded
- The calculation and methodology are unchanged from the S&P/MIB Index
- Capital and total return versions are available for this index
- The index has been designed to be used as a basis for the creation of ETFs, tracker funds, derivatives, and structured products
- The index is calculated in accordance with the Industry Classification Benchmark (ICB), a global standard used by investors worldwide
