Hella KGaA Hueck & Co. is the parent company of the Hella Group.

Hella, founded as *Westfälische Metall-Industrie Aktien-Gesellschaft (WMI)*, is a global, independent family-owned company with focus on lighting and electronic products for the automotive industry on the one hand, and aftermarket business on the other hand. Hella is one of the 100 largest German industrial companies. It has approximately 23,000 employees at more than 70 manufacturing facilities, production subsidiaries and joint ventures throughout the world. More than 3,250 engineers and technicians work in research and development. Customers of Hella include all leading vehicle and system manufacturers, as well as the automotive parts aftermarket.

As an automotive parts supplier, Hella develops and manufactures lighting and electronic components and systems for the automotive industry and special/niche vehicles (like trucks, busses, agricultural vehicles etc.). In addition, Hella has one of the largest aftermarket organisations in the world for automotive parts, accessories, diagnosis and service with its own sales companies and partners in more than 100 countries. Through extensive technological know-how and innovative products, Hella has a strong position with its clients including almost all international Original Equipment Manufacturers (OEMs) in the automotive industry, with limited exposure to critical OEMs in the USA. In addition, Hella maintains one of the largest aftermarket organisations for automotive parts which contributes currently approximately 30 % of revenues. In 2008/2009, direct original equipment business with OEMs accounted for 70 % of revenues whilst aftermarket business accounted for almost 30 %.

Hella's business field has been continually growing from the start more than 100 years ago. Alongside

the original core area of vehicle lighting, Hella now comprises another two strong business areas in the form of automotive electronics and the automotive parts aftermarket. In addition, joint venture companies have been founded to expand business activities even further e.g. front-end-modules (HBPO), air-conditioning systems (BHTC), the design of vehicle electric architectures (Intedis), chassis electronics for Korean OEMs (Mando-Hella-Electronics) and diagnostic systems (Hella-Gutmann Solutions).

In the financial year 2008/2009, consolidated revenues of the Hella Group were €3,285 million (2007/2008: €3,940 million) and were regionally divided as follows: Germany 36 %, Central and Eastern Europe 6 %, Rest of Europe 32 %, NAFTA region 13 %, Asia-Pacific and other regions 13 %. EBITDA amounted to €279 million in 2008/2009 (2007/2008: €438 million).

Hella is organised in the three business divisions Lighting, Electronics and Aftermarket & Special OE. Its Original Equipment (OE) Business with car manufacturers and other automotive parts suppliers spans the business divisions Lighting and Electronics.

Hella's Original Equipment (OE) Business with car manufacturers and other automotive parts suppliers (Tier-X) spans the business divisions Lighting and Electronics. Hella's OE product portfolio ranges from headlamps and lighting electronics over driver assistance systems and energy management to body electronics and components. By combining advanced lighting and electronics know-how Hella occupies a market position and benefits from manifold synergies between these two competences.

With consolidated revenues in 2008/2009 of €1,459 million (2007/2008: €1,669 million) the business division Lighting is Hella's largest business field. The product range covers headlamps, signal lamps, interior lighting and lighting electronics. Hella considers itself as having achieved a position of technological leadership in this segment during the last years by strengthening its competences in the field of light-based driver assistance systems, LED technology, styling and lighting electronics. In 2008, Hella concluded the development of the first full-LED headlamp in the world and started large-scale series production in the USA. In the Lighting business, Hella has established a global presence via direct investments and strategic alliances and has strong customer relationships, especially with German manufacturers.

The business division Electronics accounted for consolidated revenues in 2008/2009 of €911 million (2007/2008: €1,167 million). Hella is one of the leading suppliers of automotive electronics and focuses on the segments body electronics, energy management, driver assistance systems and components (e.g. sensors, actuators). The balanced product portfolio ranges from complex electronic to commodity.

Hella's competitive strength in the Electronics segment is a result of innovative strength and the major market relevance of the product spectrum. Therefore Hella has sustainable and established market positions in energy management and driver assistance / safety applications together accounting for sales of more than €200 million in 2008/2009. In this business division, Hella is also pursuing a consistent strategy of internationalisation, especially for production and development. The above-average growth of the number of Chinese production facilities as well as the further strengthening of the development network in China, India and Romania underlines this approach.

Hella has a well-established technical competence in electronics and mechatronics together with a competence in developing electronic systems and modules aside from components. A development and manufacturing network provides on-site support for customers at the major locations Germany, USA, Mexico, China, Korea, India and Romania. The network is completed by a customer support centre in Tokyo/Japan.

In the business division Aftermarket & Special OE, Hella operates its automotive service parts business, wholesale business and its original equipment business for commercial vehicles and special applications. The business division accounted for consolidated revenues in 2008/2009 of €915 million (2007/2008: €1,104 million).

Hella has the second largest aftermarket organisation in Europe (behind Bosch) for automotive parts and accessories, with its own sales companies and partners in more than 100 countries around the

world. Through these, Hella supplies the automotive service parts aftermarket and garages with a comprehensive and steadily growing range of service parts in the segments lighting, electrics, electronics and thermal management. Summary of Risk Factors regarding the Notes

An investment in the Notes involves certain risks associated with the characteristics of the Notes which could lead to substantial losses that Holders would have to bear in the case of selling their Notes or with regard to receiving interest payments and repayment of principal. Those risks include that:

- the Notes may not be a suitable investment for any investor;
- prior to the issue, there has been no public market for the Notes and there can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue; in an illiquid market, an investor might not be able to sell his Notes at any time at fair market prices;
- the price of the Notes falls as a result of changes in market interest rates;
- market value of the Notes could decrease if the creditworthiness of the Hella Group worsens or as a result of changes in IFRS and *HGB*/German Commercial Code standards applicable to Hella;
- the Notes may be subject to early redemption at the principal amount, if the Issuer becomes obligated to bear withholding taxes which are or will be leviable on payments of principal or interest in respect of the Notes; if the Issuer calls and redeems the Notes in such case, the noteholders may only be able to reinvest the redemption proceeds in securities with a lower yield;
- a Holder is subject to the risk to be outvoted and to lose rights towards the Issuer against his will in the case that Holders agree pursuant to the Conditions of Issue to amendments of the Conditions of Issue by majority vote according to the *Schuldverschreibungsgesetz 2009* (Law on Debt Securities). In the case of an appointment of a noteholders' representative for all Holders a particular Holder may lose, in whole or in part, the possibility to enforce and claim his rights against the Issuer regardless of other Holders;
- the euro denominated Notes could represent a currency risk for a Holder if the euro represents a foreign currency to such Holder; in addition governments and competent authorities could impose exchange controls in the future; and
- there is no restriction on the amount of debt which the Issuer may incur in the future.

The realisation of any of the risks described above may affect the Issuer's ability to fulfil its payment obligations under the Notes and/or lead to a decline in the market price of the Notes.

Hella KGaA Hueck & Co. ist die Muttergesellschaft der Hella-Gruppe.

Hella wurde als *Westfälische Metall-Industrie Aktien-Gesellschaft (WMI)* gegründet und ist ein weltweit operierendes, eigenständiges Familienunternehmen, das sich einerseits schwerpunktmäßig auf die Herstellung von Licht- und Elektronikprodukten für die Automobilindustrie und andererseits auf den Handel mit KfZ-Teilen und -Zubehör konzentriert. Hella zählt zu den 100 größten Industrieunternehmen Deutschlands. Weltweit sind ca. 23.000 Angestellte in mehr als 70 Fertigungsstätten, Produktions- und Tochtergesellschaften und Joint-Ventures beschäftigt. Über 3.250 Ingenieure und Techniker arbeiten in der Forschung und Entwicklung. Zu den Kunden von Hella zählen alle führenden Automobil- und Systemhersteller sowie der Kfz-Teile und –Zubehör-Handel.

Als Automobilzulieferer entwickelt und fertigt Hella Komponenten und Systeme der Lichttechnik und der Elektronik für die Automobilindustrie und für Spezial- und Nischenfahrzeuge (z.B. Lastkraftwagen, Busse und Landmaschinen). Zusätzlich ist Hella in Zusammenarbeit mit eigenen Vertriebsgesellschaften und Partnern in mehr als 100 Ländern eine der weltweit größten Handelsgeschäftsorganisationen für Automobilteile, Zubehör, Diagnosesysteme und Dienstleistungen. Aufgrund des umfangreichen technischen Know-Hows und der innovativen Produkte hat Hella eine starke Stellung bei seinen Kunden, zu denen nahezu alle international tätigen Erstausrüster (OEM) der Automobilindustrie gehören, bei einem geringen Geschäftsanteil mit kritischen Erstausrüstern in den USA. Des Weiteren ist Hella einer der größten Zulieferer für KfZ-Teile und -Zubehör, der derzeit ca. 30 % der Umsatzerlöse erwirtschaftet. Im Geschäftsjahr 2008/2009 betrug der Umsatzanteil des direkten Erstausrüstergeschäfts mit Erstausrüstern 70 %, während das KfZ-Teile und –Zubehör-Geschäft 30% der Umsätze ausmachte.

Hellas Tätigkeitsbereich hat sich seit den Anfängen des Unternehmens vor über 100 Jahren kontinuierlich erweitert. Neben dem ursprünglichen Kerngeschäft der Fahrzeugbeleuchtung verfügt Hella derzeit mit den Sparten Fahrzeugelektronik und KfZ-Teile und -Zubehör über zwei weitere starke Geschäftsbereiche. Ferner konnte durch die Gründung von Joint-Ventures die Geschäftstätigkeit noch weiter ausgeweitet werden, z.B. um die Bereiche Frontend-Module (HBPO), Klimaanlagen (BHTC), die Entwicklung des Bordnetz-Systems (Intendis), Chassis-Elektronik für koreanische Erstausrüster (Mando-Hella-Electronics) und Fahrzeugdiagnosesysteme (Hella-Gutmann Solutions).

Im Geschäftsjahr 2008/2009 betrug der Konzernerlös der Hella-Gruppe € 3.285 Millionen (2007/2008: € 3.940 Millionen) und war regional wie folgt aufgeteilt: Deutschland 36 %, Mittel- und Osteuropa 6 %, sonstiges Europa 32 %, NAFTA-Region 13 %, Asien-Pazifik-Raum und sonstige Regionen 13 %. Das EBITDA betrug im Geschäftsjahr 2008/2009 € 279 Millionen (2007/2008: € 438 Millionen).

Hella ist in die drei Geschäftsbereiche Licht, Elektronik und Aftermarket & Special OE aufgeteilt. Hellas Erstausrüstergeschäft mit Automobilherstellern und anderen Automobilzulieferern umfasst die Geschäftsbereiche Licht und Elektronik.

Hellas Erstausrüstergeschäft mit Automobilherstellern und anderen Automobilzulieferern (Tier-X) umfasst die Geschäftsbereiche Licht und Elektronik. Hellas Produktpotfolio im Erstausrüstergeschäft

reicht von Scheinwerfern, Licht-Elektronik, Fahrerassistenzsystemen und Energiemanagement bis hin zu Karosserieelektronik- und Komponenten. Durch die Verknüpfung des hochentwickelten Know-Hows in der Licht- und Elektroniksparte hat Hella eine besondere Marktstellung inne und profitiert von den mannigfachen Synergien zwischen den beiden Kompetenzbereichen.

Der Geschäftsbereich Licht ist Hellas größter Geschäftsbereich, dessen konsolidierte Umsatzerlöse im Geschäftsjahr 2008/2009 € 1.459 Millionen betrug (2007/2008: € 1.669 Millionen). Das Produktpotfolio umfasst Scheinwerfer, Signalleuchten, Innenleuchten und Licht-Elektronik. Hella zufolge, ist das Unternehmen in diesem Bereich durch die Stärkung seiner Kompetenzen in den Sparten lichtbasierte Fahrerassistenzsysteme, LED Technik, Elektronikdesign und Licht-Elektronik in den letzten Jahren technologischer Marktführer geworden. Im Jahr 2008 schloss Hella die Entwicklung des weltweit ersten Voll-LED-Scheinwerfers ab und begann in den USA im großen Umfang mit der Serienproduktion. Im Lichtgeschäft hat sich Hella weltweit mittels direkter Investitionen und strategischer Verbindungen etabliert und verfügt über enge Kundenbindungen, insbesondere zu deutschen Herstellern.

Der konsolidierte Umsatzerlös des Geschäftsbereichs Elektronik betrug im Geschäftsjahr 2008/2009 € 911 Millionen (2007/2008: € 1.167 Millionen). Hella gehört zu den führenden Zulieferern der Automobilelektronik und konzentriert sich auf die Produktsegmente Karosserieelektronik, Energiemanagement, Fahrzeugassistenzsysteme und -komponenten (z.B. Sensoren und Motorraumsteller). Das ausgeglichene Produktpotfolio reicht von komplexer Elektronik bis hin zu Gebrauchsgegenständen.

Hellas Wettbewerbskraft im Elektroniksegment resultiert aus der innovativen Stärke und der wesentlichen Marktrelevanz des Produktspektrums. Deshalb hat Hella eine nachhaltige und etablierte Marktposition im Energiemanagement und dem Fahrerassistenz/Sicherheitsanwendungsbereich inne, welche im Geschäftsjahr 2008/2009 zusammen mehr als € 200 Millionen an Umsatzerlösen erwirtschafteten. In diesem Geschäftsbereich verfolgt Hella eine konsequente Internationalisierungsstrategie, insbesondere bezüglich der Produktion und Entwicklung. Das überdurchschnittliche Wachstum der chinesischen Produktionsstätten sowie die weitere Stärkung des Entwicklungsnetworkes in China, Indien und Rumänien unterstreichen diese Vorgehensweise.

Hella verfügt neben fundierten technischen Kompetenzen in der Elektronik- und Mechatroniksparte über Kompetenzen in der Entwicklung von elektronischen Systemen und Modulen abgesehen von Komponenten. Ein Netzwerk aus Entwicklern und Herstellern bietet den Kunden an wichtigen Standorten in Deutschland, den USA, Mexiko, China, Korea, Indien und Rumänien technische Hilfestellungen vor Ort an. Das Netzwerk wird durch ein Kundenbetreuungszentrum in Tokio/Japan ergänzt.

Im Geschäftsbereich Aftermarket & Special OE betreibt Hella den Handel mit KfZ-Teilen und -Zubehör, das Großhandelsgeschäft und das Erstausrüstergeschäft für Nutzfahrzeuge und Spezialausrüstungen. Der Geschäftsbereich erwirtschaftete im Geschäftsjahr 2008/2009 Umsatzerlöse von € 915 Millionen (2007/2008: € 1.104 Millionen).

Hella ist europaweit der zweitgrößte Zulieferer (nach Bosch) für KfZ-Teile und -Zubehör mit eigenen Vertriebsgesellschaften und Partnern in über 100 Ländern weltweit. Durch diese beliefert Hella den Handel mit KfZ-Teilen und -Zubehör und Automobilwerkstätten mit einem umfangreichen und stetig wachsenden Portfolio von Serviceteilen in den Segmenten Licht, Elektrik, Elektronik und Thermo-Management. Darüberhinaus erhält der KfZ-Teile und -Zubehör-Handel und die Werkstätten anhand eines modernen und schnellen Informations- und Bestellsystems sowie durch kompetenten technischen Service Unterstützung beim Vertrieb.

Zusammenfassung der Risikofaktoren in Bezug auf die Schuldverschreibungen

Eine Anlage in die Schuldverschreibungen ist mit bestimmten Risiken im Zusammenhang mit den Merkmalen der Schuldverschreibungen verbunden. Diese Risiken könnten zu erheblichen Verlusten führen, die die Gläubiger zu tragen hätten, wenn sie ihre Schuldverschreibungen verkaufen oder wenn Verluste im Zusammenhang mit der Zahlung von Zinsen oder der Rückzahlung entstehen. Zu diesen Risiken gehört, dass:

- die Schuldverschreibungen nicht für jeden Anleger geeignet sind;
- vor der Begebung der Schuldverschreibungen für diese kein Markt existierte und keine

Gewissheit besteht, dass ein liquider Sekundärmarkt für die Schuldverschreibungen entstehen wird, oder, sofern er entsteht, fortbestehen wird; in einem illiquiden Markt könnte es sein, dass ein Anleger seine Schuldverschreibungen nicht jederzeit zu angemessenen Marktpreisen veräußern kann;

- der Wert der Schuldverschreibungen auf Grund von Veränderungen des Zinsniveaus fällt;

- die Schuldverschreibungen vorzeitig zum Nennbetrag zurückgezahlt werden können, falls die Emittentin zur Zahlung von Quellensteuern auf die Zahlung von Kapital oder Zinsen der Schuldverschreibungen verpflichtet ist; wenn die Emittentin die Schuldverschreibungen kündigt und zurückzahlt, kann es sein, dass die Gläubiger den aus der Rückzahlung vereinnahmten Betrag lediglich in Wertpapiere mit niedrigerer Rendite reinvestieren können;
- ein Gläubiger dem Risiko ausgesetzt ist, überstimmt zu werden und gegen seine Willen Rechte gegenüber der Emittentin zu verlieren, falls die Gläubiger nach den Anleihebedingungen durch Mehrheitsbeschluss nach Maßgabe des Schuldverschreibungsgesetzes von 2009 (SchVG) Änderungen der Anleihebedingungen zustimmen. Im Falle der Bestellung eines gemeinsamen Vertreters aller Gläubiger, kann ein einzelner Gläubiger ganz oder teilweise die Möglichkeit verlieren, seine Rechte gegenüber der Emittentin unabhängig von anderen Gläubigern geltend zu machen und durchzusetzen;
- die auf Euro lautenden Schuldverschreibungen für solche Anleger ein Währungsrisiko bedeuten können, für die der Euro eine Fremdwährung darstellt; ferner könnten Regierungen und zuständige Behörden künftig Devisenkontrollen einführen; und
- die Höhe der Schulden, die die Emittentin in Zukunft eingehen kann, nicht begrenzt ist.

Der Eintritt eines jeden der vorgenannten Risiken kann die Fähigkeit der Emittentin beeinträchtigen, ihren aus den Schuldverschreibungen resultierenden Zahlungsverpflichtungen nachzukommen und/oder zu einem Wertverlust der Schuldverschreibungen führen.

RISK FACTORS

Risks relating to the Issuer

The risks that might have a material impact on the business operations of the Hella Group include the following:

Performance risks

Performance risks describe risks that have a negative impact on the course of business due to deficits in or external influences of the process or organisational procedures of the Issuer. The main risk potential in the operative course of business lies in the calculation of complex projects mostly running for a period of several years and in the technical and economical handling thereof. Particularly, this includes unexpected technical problems, unpredictable developments at the project sites as well as problems with business partners. Should any of these performance risks materialise, this would have a material adverse effect on the financial position of the Issuer.

Strategic risks

The business strategy of the Hella Group involves acquisitions and investments in its core businesses. This strategy depends in part on its ability to successfully identify and acquire, on acceptable terms, assets and/or shareholdings in companies that enhance the Hella Group's businesses. If the Issuer fails in this respect, this could have a material adverse effect on its financial position and results of operation.

Sales market and economic fluctuations risks

The Hella Group depends heavily on the market development in the automotive industry. The Group's turnover can be allotted to customers in the automotive industry, their suppliers and the independent aftermarket. Due to a fall in demand on these markets in the last couple of years, overcapacities have arisen causing a decrease in turnover and a heightened pressure on prices in all divisions of the Group which might consequently negatively impact the financial and profit situation of the Group.

Decreasing vehicle sales and production volumes pose sales risks for Hella in volume and monetary terms, as well as earnings. Such risks arise because automotive manufacturers do not commit to minimum purchase quantities from their suppliers although a supplier is nominated for a certain vehicle.

Automobile manufacturers are increasingly being impacted by a simultaneous mixture of innovation, cost-cutting pressure, and shorter product development cycles, and are passing these pressures on to their suppliers such as Hella. In particular, automobile manufacturers expect lower prices from suppliers for the same, in some cases even enhanced, functionality, plus consistently high product quality. This situation requires Hella to maintain a sustained cost management and a broad-based product structure.

Ongoing is the discussion concerning restrictions and limitations of car traffic, discussed under the topic "climate change". Measures adopted in this regard could result in a material decrease of the demand for cars of each type and therefore also in a material decrease of the demand for products produced by Hella which would have a material adverse effect on its financial position and results of operation.

Unfavourable economic and political conditions

The Hella Group's business is dependent on general global economic conditions, particularly within Europe, the USA and Asia. A significant deterioration in these conditions, such as a continued economic slowdown, recession or sustained loss of consumer confidence and consumer demand, could trigger a decline (including decreasing production and reduction of capacity) in industries in which the Hella Group operates and therefore have a material adverse effect on the Hella Group's result of operations.

In addition, the Hella Group may be adversely affected by political and economic developments in any of the countries in which the Hella Group operates. The Hella Group's operations are also subject to a variety of other risks and uncertainties related to trading in numerous foreign countries, including political or economic upheaval and the imposition of any import, investment or currency restrictions, including tariffs and import quotas or any restrictions on the repatriation of earnings and capital.

Intense competition and overcapacity

The Hella Group faces competition from several international companies as well as local and regional companies in the countries in which it operates. Increased competition and unanticipated actions by competitors or customers as well as overcapacity in certain industries could lead to downward pressure on prices and/or a decline in the Hella Group's market share, which would adversely affect its results and hinder its growth potential.

Intense competition exists in particular with regard to prices, product quality as well as the development and launch periods of newly-developed products carrying a higher profit risk due to marketing risks and high expenses for the market development, product launch and market penetration. There exists the risk of new developments and new expertise on the part of the competitors, *i.e.* if one of the competitors was able to outperform Hella Group with respect to advances in technological development, the Group might lose its current market position and could thus suffer significant losses in turnover.

Due to the intense competition and the current decline in economic activity within the automotive industry, an immense price pressure is exercised by the manufacturers of automobiles and commercial vehicles, by examining the prices in irregular intervals by means of international inquiries. Thus Hella Group runs the risk of having to adjust its prices downwards. Should Hella fail to meet the price demands of the manufacturers, it is not guaranteed that new orders or follow-up orders will be placed with Hella for models or model ranges already supplied by Hella. Furthermore, Hella runs the risk of losing individual existing orders within a few months, if it fails to withstand the enduring international pressure on prices. The loss of these orders would result in a decrease in turnover and would consequently have significant negative effects on the financial and profit situation of the Group.

Dependency on a number of major customers

Hella generates the predominant part of its turnover from a number of individual customers, primarily the major automobile manufacturers. These customers are therefore vital for the business development of Hella Group. In the financial year 2008/2009, the largest customer for the Group held a share of approximately 16 % of the Group's turnover and the five next largest customers together held a share of approximately 28 % of the Group's turnover.

In the case Hella fails to keep these customers or fails to compensate for a significant decline in sales with other customers or fails to acquire new customers, the entire Hella Group would be negatively impacted by this in respect of its performance.

Furthermore, there is the risk of bad debt losses, especially in connection with composition or insolvency proceedings due to high pension and health insurance obligations of Hella's customers in the USA.

Warranty and patent infringements

Hella Group's future profitability depends on the ability to offer competitive prices while maintaining a high level of quality. A shrinking product quality could severely damage the Group's image as a manufacturer and thereby negatively affect its future sales and, as a consequence, its future operative results. Additionally, component parts or assembly defects could require Hella or its customers, in particular in the automotive sector, to undertake service actions and recall campaigns.

Product defects lead to liability risks and the need for costly replacement measures. The Issuer has to conduct a careful product development and extensive quality management, including intensive market

monitoring. Additionally, it might be necessary for the Issuer to take appropriate insurance policies and other precautionary measures. Due in particular to uncertainties in the legal system of the USA, where first-instance decisions are generally made by lay-person juries, there is no assurance that individual product liability claims will not exceed the related provisions.

The extent of patent or trademark protection varies from country to country. In some of the countries in which the Issuer operates, patent or trademark protection may be significantly weaker than in the USA or the European Union. Piracy of patent- or trademark-protected intellectual property has often occurred in recent years, particularly in some Asian and Eastern European countries. In particular, these countries could facilitate competition within their markets from counterfeit manufacturers who would otherwise be unable to introduce competing products for a number of years. If the Issuer is unable to adequately protect its patents and intellectual property its financial position could be adversely affected. The Issuer currently does not expect any proposed patent or trademark law modifications to affect it materially. Nevertheless, if a country in which the Issuer sells a substantial volume of an important product were to effectively invalidate the Issuer's patent or trademark rights in that product, the Issuer's revenues could suffer.

Strongly fluctuating raw-material prices

Significant variations in the cost and availability of raw materials and energy may reduce Hella's operating results. The prices and availability of raw materials and energy vary with market conditions and may be highly volatile. There have been in the past, and may be in the future, periods during which the Hella Group may not be able to pass raw material price increases on to customers. Even in periods during which raw material prices decrease, the Hella Group may suffer decreasing operating profit margins if the prices of raw materials decrease more slowly than the selling prices of Hella's products. In addition, supply interruptions of production materials, resulting from shortages, labour strikes or supplier insolvencies or other factors, could have a negative effect as well.

Hella is mainly affected by the development of the prices for crude oil based products (plastics) and copper. Since these raw materials are usually purchased in U.S. Dollars, a stronger U.S. Dollar could represent a further price risk for Hella companies that are outside of the USA and whose currency is not tied to the U.S. Dollar.

Personnel risks

Highly qualified employees are vital for Hella as an innovative company. Fluctuation carries the risk of a loss of expertise. The knowledge and expertise of its employees constitute one of Hella's most important success factors. Therefore it is essential for Hella's success to attract and to employ sufficient numbers of qualified staff. There is no guarantee that in the future Hella will succeed in hiring and retaining the required number of qualified technical and management personnel. Such failure could have a material adverse effect on Hella's financial position and results of operation.

IT risks

In a centralized, standardized IT environment, there is a risk of excessive dependence on a single system or a single data center. In that case, a system failure could have serious consequences for the entire Group. Due to its worldwide operations the Hella Group strongly depends on complex information technology. As a result of the increasing complexity of electronic information and communication technology, Hella is exposed to various risks in this context, ranging from the loss or theft of data, stoppages and interruptions to the business, to system failure.

Disproportionate rise of personnel expenditures at Eastern European sites

Hella operates production sites in Eastern European countries, most notably in the Czech Republic and Slovakia. The fact that Eastern European countries have joined the EU on the one hand and the continuing shifting of workplaces of other companies to the vicinity of Hella Group's production sites, might lead to a sharp increase of the wage level at those production sites. If this wage increase is not successfully limited or a higher fluctuation of employees corresponding thereto is not counteracted and this cost increase can not be passed on to Hella's customers, this might have significant negative effects on the financial position and results of operation of the Group.

Risks relating to the Notes

An investment in the Notes involves certain risks associated with the characteristics, specification and type of the Notes which could lead to substantial losses that Holders would have to bear in the case of selling their Notes or with regard to receiving interest payments and repayment of principal. Risks regarding the Notes comprise, *inter alia*, the following risks:

Notes may not be a suitable investment for all investors

Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation and the investment(s) it is considering, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where principal or interest is payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Notes; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Liquidity Risk

Application has been made to the Luxembourg Stock Exchange for the Notes to be admitted to trading on the Luxembourg Stock Exchange's regulated market and to be listed on the official list of the Luxembourg Stock Exchange. However, there is a risk that no liquid secondary market for the Notes will develop or, if it does develop, that it will not continue. The fact that the Notes may be listed does not necessarily lead to greater liquidity as compared to unlisted Notes. In an illiquid market, an investor is subject to the risk that he will not be able to sell his Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Risk of Early Redemption

The Notes may be redeemed at the option of the Issuer (in whole, but not in part) at the principal amount of the Notes plus accrued interest to the date fixed for redemption, for reasons of taxation, as more fully described in the Conditions of Issue. In the event that the Issuer exercises the option to redeem the Notes, the Holders might suffer a lower than expected yield and might not be able to reinvest the funds on the same terms.

Market Price Risk

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the Notes. The Holders are therefore exposed to the risk of an unfavourable development of market prices of their Notes which materialise if the Holders sell the Notes prior to the final maturity. If a Holder decides to hold the Notes until final maturity, the Notes will be redeemed at the amount set out in the Conditions of Issue.

The market value of the Notes could decrease if the creditworthiness of the Hella Group worsens

If, e.g., because of the materialisation of any of the risks regarding the Issuer, the likelihood that the Issuer will be in a position to fully perform all obligations under the Notes when they fall due decreases, the market value of the Notes will suffer. In addition, even if the likelihood that the Issuer will be in position to fully perform all obligations under the Notes when they fall due actually has not decreased, market participants could nevertheless have a different perception. In addition, the market participants' estimation of the creditworthiness of corporate debtors in general or debtors operating in the same business as the Hella Group could adversely change.

If any of these risks occurs, third parties would only be willing to purchase Notes for a lower price than before the materialisation of said risk. Under these circumstances, the market value of the Notes will decrease.

Currency Risk

The Notes are denominated in euro. If such currency represents a foreign currency to a Holder, such Holder is particularly exposed to the risk of changes in currency exchange rates which may affect the yield of such Notes. Changes in currency exchange rates result from various factors such as macro-economic factors, speculative transactions and interventions by central banks and governments.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal at all.

Fixed Rate Notes

The Notes bear a fixed interest rate. A Holder of fixed rate Notes is particularly exposed to the risk that the price of such Notes falls as a result of rising market interest rate. While the nominal interest rate of a fixed rate Note as specified in the Conditions of Issue is fixed during the life of the Notes, the current interest rate on the capital market typically changes on a daily basis. As the market interest rate changes, the price of fixed rate Notes also changes, but in the opposite direction. If the market interest rate increases, the price of fixed rate Notes typically falls, until the yield of such Notes is approximately equal to the market interest rate of comparable issues. If the market interest rate falls, the price of fixed rate Notes typically increases, until the yield of such Notes is approximately equal to the market interest rate of comparable issues. If a Holder of the Notes holds his Notes until maturity, changes in the market interest rate are without relevance to such Holder as the Notes will be redeemed at the principal amount of the Notes.

Risks in connection with the application of the Schuldverschreibungsgesetz 2009 (Law on Debt Securities)

A Holder is subject to the risk to be outvoted and to lose rights towards the Issuer against his will in the case that Holders agree pursuant to the Conditions of Issue to amendments of the Conditions of Issue by majority vote according to the *Schuldverschreibungsgesetz 2009* (Law on Debt Securities). In the case of an appointment of a noteholders' representative for all Holders a particular Holder may lose, in whole or in part, the possibility to enforce and claim his rights against the Issuer regardless of other Holders.

Changes in Accounting Standards (IFRS and HGB/German Commercial Code)

Hella's annual financial statements are prepared in accordance with IFRS Standards as adopted by the European Union, and the additional requirements of German commercial law pursuant to the German Commercial Code (*Handelsgesetzbuch*). New or changed accounting standards may lead to adjustments in the relevant accounting positions of Hella. This might lead to a different perception of the market regarding Hella's creditworthiness. As a result, there is a risk that the market value of the Notes might decrease.

No restriction on the amount of debt which the Issuer may incur in the future

There is no restriction on the amount of debt which the Issuer may issue which ranks equal to the Notes. Such issuance of further debt may reduce the amount recoverable by the Holders upon winding-up or insolvency of the Issuer.

USE OF PROCEEDS

In connection with the offering of the Notes, the Issuer will receive net proceeds of approximately € ●, after deducting aggregate costs and the underwriting commission aggregating approximately 0.30 % – 1.00 % of the aggregate principal amount of the Notes. The Issuer intends to use the net proceeds for purposes of its general business.

GENERAL INFORMATION ABOUT THE ISSUER

Formation and History

Hella has its roots in the *Westfälische Metall-Industrie Aktien-Gesellschaft (WMI)*, a company founded on 11 June 1899 as a special factory for lanterns, headlamps, bulb horns (cornets) and fittings for bicycles, carriages and automobiles. In 1908, the "Hella" brand name was created for the top product in the acetylene headlamp range. In 1911, the construction of the new factory on the site of the present-day Plant 1 in Lippstadt was finalised. In the early years, Hella mainly focused on the production of lamps for bicycles and vehicles. In 1923, the Hueck family acquired a majority shareholding in Hella. In 1959, the WMI group was converted into a limited partnership. The name of the company was changed to *Hella KG Hueck & Co.* in 1986. By a resolution adopted by the partners dated 13 November 2003 the company was converted into a partnership limited by shares (*KGaA*). Today, the Hueck family still plays a decisive part in the development of the Issuer as a long-term family shareholder.

Incorporation and Seat

Hella KGaA Hueck & Co. is incorporated under the laws of Germany and registered in the commercial register of the local court (*Amtsgericht*) of Paderborn under HRB 6857. Business

Overview

Hella, founded as *Westfälische Metall-Industrie Aktien-Gesellschaft (WMI)*, is a global, independent family-owned company with focus on lighting and electronic products for the automotive industry on the one hand, and aftermarket business on the other hand. Hella is one of the 100 largest German industrial companies. It has approximately 23,000 employees at more than 70 manufacturing facilities, production subsidiaries and joint ventures throughout the world. More than 3,250 engineers and

technicians work in research and development. Customers of Hella include all leading vehicle and system manufacturers, as well as the automotive parts aftermarket.

As an automotive parts supplier, Hella develops and manufactures lighting and electronic components and systems for the automotive industry and special/niche vehicles (like trucks, busses, agricultural vehicles etc.). In addition, Hella has one of the largest aftermarket organisations in the world for automotive parts, accessories, diagnosis and service with its own sales companies and partners in more than 100 countries. Through extensive technological know-how and innovative products, Hella has a strong position with its clients including almost all international Original Equipment Manufacturers (OEMs) in the automotive industry, with limited exposure to critical OEMs in the USA. In addition, Hella maintains one of the largest aftermarket organisations for automotive parts which contributes currently approximately 30 % of revenues. In 2008/2009, direct original equipment business with OEMs accounted for 70 % of revenues whilst aftermarket business accounted for almost 30 %.

Hella's business field has been continually growing from the start more than 100 years ago. Alongside the original core area of vehicle lighting, Hella now comprises another two strong business areas in the form of automotive electronics and the automotive parts aftermarket. In addition, joint venture companies have been founded to expand business activities even further e.g. front-end-modules (HBPO), air-conditioning systems (BHTC), the design of vehicle electric architectures (Intedis), chassis electronics for Korean OEMs (Mando-Hella-Electronics) and diagnostic systems (Hella-Gutmann Solutions).

Hella, with a history of more than 100 years, is still fully owned by members of the founding family and has continuously grown mostly on an organic basis. Selected acquisitions were largely driven by strategic rationale rather than growth. The Issuer has remained focused on the automotive industry, concentrating on lighting and electronics products. In parallel, management pursued the build up of a strong aftermarket business around the Hella brand to balance dependency on OEM business and benefit from the generally higher margins in that segment.

In the financial year 2008/2009, consolidated revenues of the Hella Group were €3,285 million (2007/2008: €3,940 million) and were regionally divided as follows: Germany 36 %, Central and Eastern Europe 6 %, Rest of Europe 32 %, NAFTA region 13 %, Asia-Pacific and other regions 13 %. EBITDA amounted to €279 million in 2008/2009 (2007/2008: €438 million).

Hella is organised in the three business divisions Lighting, Electronics and Aftermarket & Special OE. Its Original Equipment (OE) Business with car manufacturers and other automotive parts suppliers spans the business divisions Lighting and Electronics. By combining lighting and electronics know-how Hella occupies a unique market position and benefits from manifold synergies between these two competences.

Original Equipment Business

Hella's Original Equipment (OE) Business with car manufacturers and other automotive parts suppliers (Tier-X) spans the business divisions Lighting and Electronics. Hella's OE product portfolio ranges from headlamps and lighting electronics over driver assistance systems and energy management to body electronics and components. By combining advanced lighting and electronics know-how Hella occupies a market position and benefits from manifold synergies between these two competences.

Business Division Lighting

With consolidated revenues in 2008/2009 of €1.459 million (2007/2008: €1,669 million) the business division Lighting is Hella's largest business field. The product range covers headlamps, signal lamps, interior lighting and lighting electronics. Hella considers itself as having achieved a position of technological leadership in this segment during the last years by strengthening its competences in the field of light-based driver assistance systems, LED technology, styling and lighting electronics. In 2008, Hella concluded the development of the first full-LED headlamp in the world and started large-scale series production in the USA. Due to this fact Hella is in a leading competitive position in the industrialisation of this new and seminal technology. In the Lighting business, Hella has established a

global presence via direct investments and strategic alliances and has strong customer relationships, especially with German manufacturers.

Business Division Electronics

The business division Electronics accounted for consolidated revenues in 2008/2009 of € 911 million (2007/2008: € 1,167 million). Hella is one of the leading suppliers of automotive electronics and focuses on the segments body electronics, energy management, driver assistance systems and components (e.g. sensors, actuators). The balanced product portfolio ranges from complex electronic to commodity.

Hella's competitive strength in the Electronics segment is a result of innovative strength and the major market relevance of the product spectrum. Therefore Hella has sustainable and established market positions in energy management and driver assistance / safety applications together accounting for sales of more than € 200 million in 2008/2009. In this business division, Hella is also pursuing a consistent strategy of internationalisation, especially for production and development. The above-average growth of the number of Chinese production facilities as well as the further strengthening of the development network in China, India and Romania underlines this approach.

Hella has a well-established technical competence in electronics and mechatronics together with a competence in developing electronic systems and modules aside from components. A development and manufacturing network provides on-site support for customers at the major locations Germany, USA, Mexico, China, Korea, India and Romania. The network is completed by a customer support centre in Tokyo/Japan.

Aftermarket Business – Business Division Aftermarket & Special OE

In the business division Aftermarket & Special OE, Hella operates its automotive service parts business, wholesale business and its original equipment business for commercial vehicles and special applications. The business division accounted for consolidated revenues in 2008/2009 of € 915 million (2007/2008: € 1,104 million).

Hella has the second largest aftermarket organisation in Europe (behind Bosch) for automotive parts and accessories, with its own sales companies and partners in more than 100 countries around the world. Through these, Hella supplies the automotive service parts aftermarket and garages with a comprehensive and steadily growing range of service parts in the segments lighting, electrics, electronics and thermal management. In addition, the aftermarket and garages receive sales support in the form of a modern and fast information and ordering system as well as competent technical service.

Hella has individual production facilities for the aftermarket, allowing for adaptation to market conditions and opportunities through small feasible volumes and the access to the Hella OE spare parts.

Besides own products, more and more suppliers are discovering the advantages of the Hella aftermarket sales franchise and start to promote their products via Hella. This is supporting Hella's position towards wholesalers and improves the market position of the partner companies.

In the Special OE segment, Hella intends to further expand its market position in individual segments. Currently, the Issuer claims to hold a leading position in the equipment of buses, mobile homes and truck trailers with lighting and electric/electronic products. In addition, Hella is market leader in Europe on police vehicles equipment, with optical and acoustic warning systems.

Markets and Competition

Hella is the 9th largest German automotive supplier and belongs to the Top 50 automotive suppliers in the world in terms of revenue.

In Europe, Hella is one of the top 3 suppliers both in the headlamp and in the rear lamp business,

globally, Hella is among the top 5 (according to its own estimates). Major competitors of the Issuer are Valeo, Automotive Lighting and Koito. In the leading lighting technologies Xenon and LED, Hella considers itself as the global market leader with a market share of more than 40 %. Hella also has a significant market share in the small to mid-sized car segment, especially with European and Korean OEMs.

In the Electronics segment, Hella has so far managed to occupy attractive market segments and niches retaining a leading market position and an innovative edge against intensive competition from major automotive parts suppliers such as Bosch, Continental and Delphi, particularly in the fields of pedal sensors, intelligent battery sensors, oil sensors and vacuum pumps among others.

The business division Aftermarket & Special OE was able to further strengthen its market position in Europe as the number 2 in the past years, particularly on account of the intensified development of the product and service competence for the aftermarket and garages.

Strategy and Outlook

The near and mid term future for the automotive industry will remain challenging. Although it is likely that there will be a recovery of volumes it can be expected that overall car sales in mature markets will stay below the climax of 2007/08. Hella has anticipated this development in its plans for the next two years. The ongoing market turbulences will accelerate the already ongoing consolidation process among automotive suppliers which opens opportunities for organic and external growth for strong companies during the next years. In addition to this trend, the high and increasing need to cope with environmental and safety requirements in the automotive sector leads to an even stronger role of innovative suppliers. In addition, many new innovations for the automotive industry are generated in the fields of electronics (energy and safety) and lighting (LED). Hella intends to take advantage of these market changes.

The outlook for the Lighting division is based on further improving operations, focusing growth mainly on European and Asian regions. In terms of development, special emphasis will be placed by Hella on LED technology and light-based driver assistance systems. At the same time, the focus will be on the development of energy-efficient lighting solutions to support improving the CO₂ balance.

For further business development in the field of Electronics Hella is focusing on important global mega-trends, such as CO₂ reduction and safety. Hella already has product solutions related to these trends in its portfolio, which will be further rolled out worldwide. Hella intends to accelerate the expansion of the international development and production network while continuing its initiatives to increase operational excellence and secure quality.

The main objective for Hella's aftermarket business is to continue the growth path of the last years. Due to the current market crisis it can be expected that even more automotive parts supplier will rely on Hella's sales franchise in the next years. Business potential for Hella lies also in the strengthening of aftermarket electronics competence through garage-oriented diagnosis systems as car diagnostics also in small garages is becoming increasingly common. Furthermore, Hella intends to expand its established wholesale business within the Aftermarket & Special OE division. The fragmented Independent Aftermarket (IAM) structure offers opportunities to take advantage in the ongoing consolidation process. Hella's focus will be on attractive wholesale markets in Scandinavia and Eastern Europe. Hella also strives for further growth in attractive Special OE niche markets such as mining and marine, which are independent of the automotive industry cycle.

Organisational Structure

In operative terms, the Issuer is organised in a classic matrix structure, with the three business divisions Lighting, Electronics and Aftermarket & Special OE on the one hand, and the corporate functions such as Finance, Controlling, OE Sales and Human Resources that span all the business divisions on the other hand.

In their function as personally liable partners, these partners have not made contributions in respect of the share capital.

Every personally liable partner is authorised to represent the Issuer alone. The general meeting may resolve that a personally liable partner, who is not an individual (*i.e.* a natural person), is only authorised to represent the Issuer jointly with another personally liable partner.

The personally liable partners have the duty to conduct the Issuer's affairs. The partners' committee (as described below) can issue internal rules applicable for the personally liable partners. Such rules may specify that certain measures require the consent of the partners' committee. In such case, the personally liable partners may only act jointly. In the case of any difference of opinion between the personally liable partners on management activities, the partners' committee will decide at the request of a personally liable partner. This does not apply as long as Dr. Jürgen Behrend will be general partner. Rather, it is his vote that will be decisive in the above cases. If Dr. Jürgen Behrend should no longer be general partner and if no other individual (*i.e.* a natural person) is a personally liable partner either, the general meeting may resolve that the vote of a general partner will be decisive. Where a personally liable partner does not agree to a decision taken by the partners' committee, it is the general meeting that will take, at his request, the required decision.

The partners' committee has the duty to control and to advise the personally liable partners. Furthermore, the partners' committee has the duty to safeguard the rights in and from the shareholding in Hella Geschäftsführungsgegesellschaft mbH. The partners' committee can determine that the rights as defined in (a) and (b) are exercised by individual members of the partners' committee. The involvement of an expert who is not a member of the partners' committee, calls for the approval by the partners' committee.

As at the date of this Prospectus, the members of the partners' committee are: Dr. Jürgen Behrend, Dietrich Bracht-Frenzel, Elisabeth Fries, Roland Hammerstein, Dr. Dietrich Hueck, Prof. Dr. Dr. h. c. Gottfried Hueck, Walter Hueck and Konstantin Thomas.

Audit Committee

The Supervisory Board of the Issuer has formed an audit committee consisting of the first and second deputy chairman of the Supervisory Board, Alfons Eilers and Werner Lenke and another Supervisory Board member of the employees, Gerd-Peter Witt.

The audit committee is responsible for the pre-audit of the annual financial statements, the annual consolidated financial statements, the consolidated annual report and the appropriation of the profit for the year.

Furthermore, the audit committee prepares the agreements with the auditor and the Group auditor (in particular, the audit assignments with fee arrangements and the stipulation of auditing standards).

Board Practice

Control over and responsibilities of the management of the Issuer are derived from German corporate law, the articles of association, internal rulings and other regulations. The following contains an overview of these structures:

Characteristic features of a Kommanditgesellschaft auf Aktien (KGaA)

A *KGaA* is a company with its own legal personality (*i.e.* it is a legal person) and has at least one personally liable partner who has unlimited liability with respect to the company's creditors. The other (limited) partners participate in the capital stock, which is split into shares. Beyond these contributions, they are not personally liable for the company's debts (§ 278 (1) *AktG*).

Therefore, in terms of its legal form, a *KGaA* is a hybrid of a stock corporation and a limited commercial partnership. It is predominantly governed by the German Stock Corporation Act (*AktG*). The internal relationship between the two classes of partner – the personally liable partners (*also: general partners*) on the one hand, and the collectivity of limited partners (*also: shareholders*) – and also the management structure of the *KGaA* are aligned to commercial partnership law, while the capital structure and the rights of the shareholders are aligned to corporate law.

The main differences with respect to a joint stock corporation (*Aktiengesellschaft* or *AG*) are as follows:

- The duties performed by the management board of an *AG* are undertaken by the personally liable partner(s) of a *KGaA*. These can be natural persons or an incorporated company.
- The rights and obligations of a supervisory board of a *KGaA* are more limited than those of a supervisory board of an *AG*. In particular, the supervisory board of a *KGaA* has no authority to appoint the personally liable partners or to stipulate the contractual conditions under which they are engaged. It also has no authority to issue the rules of procedure governing the actions of the management, or to stipulate business activities requiring its consent. Moreover, in the case of a *KGaA* which, like the Issuer, is subject to the provisions of the Co-Determination Act of 1976 (*Mitbestimmungsgesetz*), there is no requirement to appoint a director of personnel.

- The general meeting of a *KGaA* essentially has the same rights as the general meeting of an *AG*; further, it votes on adoption of the annual financial statements of the *KGaA*. However, the resolutions of the general meeting require the agreement of the personally liable partners in matters for which, in a limited partnership, agreement of both the general partners and of the limited partners is required (§ 285 (2) *AktG*) or where the approval and adoption of the annual financial statements are concerned (§ 286 (1) *AktG*).

Corporate Governance Code

Hella does not comply with the recommendations of the Government Commission of the German Corporate Governance Code (*Regierungskommission Deutscher Corporate Governance-Kodex*) ("DCGC"), as the DCGC is primarily focused on listed companies and does not reflect the concept of a general partner being personally liable. However, Hella has established an effective corporate governance structure including rules of regulations for the procedures of the Management Board of Hella Geschäftsführungsgesellschaft mbH, the establishment of an advisory board consisting of recognised senior industry experts and the issue of a "Code of Conduct" regarding key guidelines for business practise of the Hella Group.

Material Contracts

There do not exist any material contracts which have been entered into in the non-ordinary course of business.

Legal and Arbitration Proceedings

There are no material legal and arbitration proceedings in place.

Rating

The rating agency Moody's Investors Service, Inc. ("Moody's") has assigned the rating Ba1 to the Issuer. Obligations of Issuers rated Ba are judged to have speculative elements and are subject to substantial credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category.

Share Capital

As of 31 May 2009, the subscribed capital of the Issuer amounts to € 200,000,000, and is divided into 200,000,000 registered shares with a nominal value of € 1.00 each which are fully paid up.

Shareholders

All shares of Hella KGaA Hueck & Co. are owned by members of the industrialist family Hueck which originally comes from the town of Lüdenscheid. The Issuer's shares are allocated among the different family members. There is no major interest from any of the shareholders.

The Issuer will start publishing interim financial statements beginning with the six-months-period ending on 30 November 2009.

Recent Developments

Since May 2009, the passenger car business in Germany has been stabilising on a low level and it is likely as if the decline in foreign demand has currently come to a halt. Due to the car tax reform and the environmental bonus in Germany, the number of newly-registered cars rose by 27 % to 2.4 million cars from January to July 2009 – a plus of half a million cars as compared to the first seven months of the previous year.

Supported by various incentive programmes, important foreign markets for the Issuer have also been showing stabilising tendencies in terms of demand for passenger cars over the past few months. Even in Spain, which had suffered a 38 % decline in demand in the first half-year, the scrapping incentive has meanwhile been making a positive impact. In July, the number of newly-registered cars was only 10 % lower as compared to the previous month. The introduction of the scrapping incentive in the USA has led to a significant softening of the downward trend. With approximately 1 million light vehicles sold, the sales figures in July only lagged behind 12 % as compared to the figures of the previous year. For the future markets China and India stable growth continues to be expected. Especially the Chinese market is becoming increasingly important for the automotive supplier industry.

Altogether, the sales trend in the passenger car business has been signalling a stabilisation on a low level since May 2009. However, it is generally not expected that the global sales and production figures of 2007/2008 might be reached in the short term. Hella has accordingly considered this development with respect to its planning.

After Hella has managed to stabilise its expense and profit situation since October 2008 by means of rapid and radical cost-cutting measures, following the sudden and to this extent completely unexpected sales decline, Hella is now adjusting its manufacturing capacity to the expected lower level for the next years. By closing down one production site in Spain and the USA, respectively, the capacity utilisation of other sites shall be improved.

In the first months of the new financial year, the implemented consolidation measures have already led to an initial recovery of profitability. Even though the results of the Group's activities are currently higher than planned, reliable forecasts for the future, in particular the next two financial years, are hard to give at present. In the first half-year of 2010, it is expected that further insolvencies on the part of suppliers and manufacturers might result in an increase of unemployment figures with negative effects for consumer behaviour; various programmes supporting the scrapping incentive will end Europe-wide and cause the market activity to slow down.

(d) If in the case of a Step Up Rating Change because of a downgrade of the rating of the Issuer by all Rating Agencies, only one Rating Agency publicly announces or confirms in writing to the Issuer an increase in or reinstatement of the rating of the Issuer (which has been granted at the request of the Issuer) so that such rating is Ba1 or equivalent or better

The tax on interest payments (*Zinsabschlagsteuer*, since 1 January 2009: *Kapitalertragsteuer*) which has been in effect in the Federal Republic of Germany since 1 January 1993 and the solidarity surcharge (*Solidaritätszuschlag*) imposed thereon as from 1 January 1995 do not constitute a tax on interest payments as described above in respect of which Additional Amounts would be payable by the Issuer.

TAXATION

The following is a general description of certain tax considerations relating to the Notes in Germany and Luxembourg. It does not purport to be a complete analysis of all tax considerations relating to the Notes. Prospective purchasers of Notes should consult their tax advisers as to the consequences, under the tax laws of the country in which they are resident for tax purposes and under the tax laws of Germany and Luxembourg of acquiring, holding and disposing of Notes and receiving payments of principal, interest and other amounts under the Notes. This summary is based upon the laws in force and their interpretation on the date of this Prospectus and is subject to any change in law or interpretation that may take effect after such date.

Federal Republic of Germany

Income tax

Notes held by German tax residents as private assets

- Taxation of interest

Payments of interest on the Notes to Holders who are tax residents of Germany (*i.e.*, persons whose residence or habitual abode is located in Germany) are subject to German income tax, and, if applicable, church tax. In each case where German income tax arises, a solidarity surcharge (*Solidaritätszuschlag*) is levied in addition.

Payments of interest on the Notes to individual tax residents of Germany will generally be subject to a flat income tax at a rate of 25 % (plus solidarity surcharge in an amount of 5.5 % of such tax, resulting in a total tax charge of 26.375 %). The total investment income of an individual will only be decreased by a lump sum deduction (*Sparer-Pauschbetrag*) of € 801 (€ 1,602 for married couples filing jointly), not by a deduction of expenses actually incurred.

If the Notes are held in a custodial account which the Holder maintains with a German branch of a German or non-German bank or financial services institution or with a securities trading business or bank in Germany (the "**Disbursing Agent**"), the flat income tax will be levied by way of withholding from the gross interest payment to be made by the Disbursing Agent.

In general, no withholding tax will be levied if the Holder is an individual (i) whose Note do not form part of the assets of a German trade or business and (ii) who filed a withholding exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent but only to the extent the interest income derived from the Note together with other investment income does not exceed the maximum exemption amount shown on the withholding exemption certificate. Similarly, no withholding tax will be deducted if the Holder has submitted to the Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the relevant local tax office.

If no Disbursing Agent (as defined above) is involved in the payment process, the Holder will have to include its income on the Notes in its tax return and the flat income tax of 25 % plus solidarity surcharge plus church tax, if any, will be collected by way of assessment.

Payment of the flat income tax by way of withholding will generally satisfy any income tax liability of the Holder in respect of such investment income. Holders may apply for a tax assessment on the basis of general rules applicable to them if the resulting income tax burden is lower than 25 %.

- Taxation of capital gains

Capital gains from the disposition or redemption of the Notes acquired after 31 December 2008 are subject to the flat income tax on investment income, irrespective of any holding period. This applies also to Notes on which the principal is effectively repaid in whole or in part although the repayment was not guaranteed.

Losses from the disposal or redemption of the Notes can only be offset against other investment income. In the event that an off-set is not possible in the assessment period in which the losses have been realised, such losses will be carried forward into future assessment periods and can be off-set against investment income generated in future assessment periods subject to minimum taxation rule.

If the Notes are held in a custodial account which the Holder maintains with a Disbursing Agent (as defined above), the flat income tax will be levied by way of withholding from the difference between the redemption amount (or the proceeds from the disposition) and the issue price (or the purchase price) of the Notes after deduction of the directly related disposition expenses. If the Notes have been transferred into the custodial account of the Disbursing Agent only after their acquisition, and no evidence on the acquisition data has been provided to the Disbursing Agent by the bank, financial services institution or domestic securities trading business or bank with which the Holder previously maintained its custodial account, withholding tax will be levied on 30 % of the proceeds from the disposition, assignment or redemption of the Notes.

If no Disbursing Agent is involved in the payment process, the Holder will have to include capital gains from the disposition or redemption of the Notes in its tax return and the flat income tax of 25 % plus solidarity surcharge plus church tax, if any, will be collected by way of assessment.

Payment of the flat income tax by way of withholding will generally satisfy any income tax liability of the Holder in respect of such investment income. Holders may apply for a tax assessment on the basis of general rules applicable to them if the resulting income tax burden is lower than 25 %.

The rules set out above with respect to the taxation of capital gains apply accordingly to (i) the proceeds from the disposition of coupons or interest claims (minus sales costs, if any) in case that such coupons or interest claims are disposed of separately (*i.e.*, without the Notes) and (ii) the proceeds from the redemption of coupons or interest claims if the Note is disposed of separately.

Notes held by German tax residents as business assets

Payments of interest on Notes, capital gains from the disposition or redemption of Notes, or proceeds from the disposition or redemption of coupons or interest claims held as business assets by German tax resident individuals or corporations (including via a partnership, as the case may be), are generally subject to German income tax or corporate income tax (in each case plus solidarity surcharge). The interest and capital gain will also be subject to trade tax if the Notes form part of the assets of a German trade or business for which a German permanent establishment is maintained.

If the Notes are held in a custodial account which the Holder maintains with a Disbursing Agent (as defined above), tax at a rate of 25 % (plus a solidarity surcharge of 5.5 % of such tax) will also be withheld from interest payments on Notes and generally also from capital gains from the disposition of Notes and from proceeds from the disposition or redemption of coupons or interest claims held as business assets. In these cases the withholding tax does not satisfy the income tax liability of the Holder, as in the case of the flat income tax, but will be credited as advance payment against the personal income or corporate income tax liability and the solidarity surcharge of the Holder. With regard to capital gains no withholding will generally be required under certain circumstances in the case of Notes held by corporations resident in Germany and upon application in the case of Notes held by individuals or partnerships as business assets in a business situated in Germany.

Notes held by German non-tax residents

Interest and capital gains are not subject to German taxation in the case of non-residents, *i.e.*, persons having neither their residence nor their habitual abode nor legal domicile nor place of effective management in Germany, unless the Notes form part of the business assets of a permanent establishment maintained in Germany or of a business in Germany for which a permanent representative has been appointed. Interest may, however, also be subject to German income tax if it otherwise constitutes income taxable in Germany, such as income from the letting and leasing of certain German-situs property or income from certain capital investments directly or indirectly secured by German situs real estate.

Non-residents of Germany are in general exempt from German withholding tax on interest and capital gains and from solidarity surcharge thereon. However, if the interest or capital gain is subject to German taxation as set forth in the preceding paragraph and the Notes are held in a custodial account with a Disbursing Agent (as defined above), withholding tax will be levied as explained above at "Notes held by German tax residents as private assets". No withholding tax should be levied on the capital gains from the disposition of the Notes or the proceeds from the disposition of the coupons or interest claims if (i) the Notes or the coupons or interest claims were held as business assets in a permanent establishment situated in Germany or as business assets in Germany for which a permanent representative was appointed and (ii) the Holder notifies the Disbursing Agent accordingly.

In addition, if the Notes are not kept in a custodial account with a Disbursing Agent and interest or proceeds from the disposition of a coupon, or proceeds from the disposition or redemption of a Note are paid by a Disbursing Agent to a non-resident of Germany, such payments will also be subject to withholding tax to the extent and at a rate as explained above under "Notes held by German tax residents as private assets".

Inheritance and Gift Tax

No inheritance or gift taxes with respect to any Note will arise under German law, if, in the case of inheritance tax, neither the decedent nor the beneficiary, or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Note is not attributable to a German trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German citizens who previously maintained a residence in Germany.

Other Taxes

No stamp, issue, registration or similar taxes or duties will be payable in the Germany in connection with the issuance, delivery or execution of the Notes. Currently, net assets tax (*Vermögensteuer*) is not levied in Germany.

Luxembourg

Non-Residents

Under the existing laws of Luxembourg and except as provided for by the Luxembourg law of 21 June 2005 implementing the EU Savings Tax Directive (as defined below), there is no withholding tax on the payment of interest on, or reimbursement of principal of, the Notes made to non-residents of Luxembourg.

Under the Luxembourg law of 21 June 2005 implementing the EU Savings Tax Directive and as a result of ratification by Luxembourg of certain related Accords with the relevant dependent and associated territories, payments of interest or similar income made or ascribed (*attribué*) by a paying agent established in Luxembourg to or for the immediate benefit of an individual or certain residual entities, who, as a result of an identification procedure implemented by the paying agent, are identified as residents or are deemed to be residents of an EU Member State other than Luxembourg or certain of those dependent or associated territories referred to under "EU Savings Tax Directive" below, will be subject to a withholding tax unless the relevant beneficiary has adequately instructed the relevant paying agent to provide details of the relevant payments of interest or similar income to the fiscal authorities of his/her country of residence or deemed residence or has provided a tax certificate from his/her fiscal authority in the format required by law to the relevant paying agent. Where withholding tax is applied, it will be levied at a rate of 20 % until 30 June 2011 and at a rate of 35 % thereafter.

Residents

According to the law of 23 December 2005, as amended, interest on Notes paid by a Luxembourg paying agent or paying agents established in the EU or EEA to an individual holder of a Note who is a resident of Luxembourg or to a foreign residual entity securing the payment for such individual will be subject to a withholding tax of 10 %. In case of payment by paying agents established in the EU or EEA, the individual holder of a Note must under a specific procedure remit the 10 % tax to the Luxembourg Treasury.

If the individual Holder holds the Notes in the course of the management of his or her private wealth, the aforementioned 10 % withholding tax will operate a full discharge of income tax due on such payments. Interest on Notes paid by a Luxembourg paying agent to a holder of a Note who is not an individual is not subject to withholding tax.

When used in the preceding paragraphs "interest", "paying agent" and "residual entity" have the meaning given thereto in the Luxembourg laws of 21 June 2005 (or the relevant Accords) and 23 December 2005, as amended. "Interest" will include accrued or capitalised interest at the sale, repayment or redemption of the Notes.

Payments of interest or similar income under the Notes to Clearstream Banking AG, Clearstream Banking, société anonyme and Euroclear Bank SA/NV and payments by or on behalf of Clearstream Banking, société anonyme to financial intermediaries will not give rise to a withholding tax under Luxembourg law.

EU Savings Tax Directive

Under the EU Council Directive 2003/48/EC dated 3 June 2003 on the taxation of savings income in the form of interest payments (the "**EU Savings Tax Directive**") each EU Member State must require paying agents (within the meaning of such directive) established within its territory to provide to the competent authority of this state details of the payment of interest made to any individual resident in another EU Member State as the beneficial owner of the interest. The competent authority of the EU Member State of the paying agent is then required to communicate this information to the competent authority of the EU Member State of which the beneficial owner of the interest is a resident.

For a transitional period, Austria, Belgium and Luxembourg may opt instead to withhold tax from interest payments within the meaning of the EU Savings Tax Directive at a rate of 20 % since 1 July 2008, and of 35 % from 1 July 2011.

In Germany, provisions for implementing the EU Savings Tax Directive have been enacted by legislative regulations of the Federal Government. These provisions apply since 1 July 2005.

If a payment were to be made or collected through a Member State which has opted for a withholding system and an amount of, or in respect of, tax were to be withheld from that payment, neither the Issuer nor any Paying Agent nor any other person would be obliged to pay additional amounts with respect to any Note or Coupon as a result of the imposition of such withholding tax. The Issuer will be required to maintain a Paying Agent in a Member State that will not be obliged to operate a withholding system pursuant to the Savings Directive or any law implementing or complying with or introduced to conform to such directive.

On 15 September 2008 the European Commission issued a report to the Council of the European Union on the operation of the Savings Directive, which included the Commission's advice on the need for changes to the Savings Directive. On 13 November 2008 the European Commission published a more detailed proposal for amendments to the Savings Directive, which included a number of suggested changes. The European Parliament approved an amended version of this proposal on 24 April 2009. If any of the proposed changes are made in relation to the Savings Directive, they may amend or broaden the scope of the requirements described above.

SUBSCRIPTION, SALE AND OFFER OF THE NOTES

General

Hella KGaA Hueck & Co. has agreed in an agreement to be signed on or about 16 October 2009 to sell to Deutsche Bank AG, London Branch and The Royal Bank of Scotland plc (together, the "**Joint Lead Managers**" or "**Managers**"), and the Managers have agreed, subject to certain customary closing conditions, to purchase, the Notes on 20 October 2009 (which date may be postponed up to two weeks, the "**Issue Date**") at a price of 1 % of their principal amount (the "**Issue Price**"). Proceeds to the Issuer will be net of commissions of approximately 0.30 % – 1.00 % of the aggregate principal amount of the Notes payable to the Managers. The Issuer has furthermore agreed to reimburse the Managers for certain expenses incurred in connection with the issue of the Notes.

The Managers are entitled, under certain circumstances, to terminate the agreement reached with the Issuer. In such event, no Notes will be delivered to investors. Furthermore, the Issuer has agreed to indemnify the Managers against certain liabilities in connection with the offer and sale of the Notes.

The Managers or their affiliates have provided from time to time, and expect to provide in the future, investment services to the Issuer and its affiliates, for which the Managers or their affiliates have received or will receive customary fees and commissions.

There are no interests of natural and legal persons other than the Issuer involved in the issue, including conflicting ones that are material to the issue.

Offer of the Notes

Offer Period and determination of Pricing Details

The Notes will be offered to investors by the Joint Lead Managers during an offer period which will commence on or about 12 October 2009 and will be open for until two business days prior to the Issue Date. The offer period may be shortened which will be published in the Pricing Notice (as defined below). Subject to market conditions, the Issue Date may be postponed up to two weeks. Prospective investors will be informed of such postponement by publication in the Pricing Notice. During the offer period, investors may submit orders to the Joint Lead Managers. On the basis of the orders received by the Joint Lead Managers the issue price, the rate of interest, the number of notes to be issued, the aggregate nominal amount and the yield of the issue will be determined on the pricing date which is expected to be on or about 13 October 2009 and will be communicated to investors. The commissions will also be published on the website of the Luxembourg Stock Exchange (www.bourse.lu). The results of the offer will be included in a notification which will be filed with the CSSF and published on the website of the Luxembourg Stock Exchange (www.bourse.lu) after the date of pricing and prior to the Issue Date (the "**Pricing Notice**"). Should the Issuer and the Joint Lead Managers determine any shortening or extension of the offer period, which could be the result of changing market conditions, such changes will be published in the same manner as the pricing details.

Public Offer

The Notes will be sold to institutional investors and retail investors in compliance with the public offer restrictions in all countries in the European Union. A public offer may be made in Luxembourg, Germany and Austria following the effectiveness of the notification of the Prospectus by the CSSF according to Article 18 of the Prospectus Directive.

Conditions and technical details of the Offer

The following sets out details of the offer which is required to comply with the requirements of the applicable prospectus regulation. There are no conditions to which the offer is subject. Any offer to purchase Notes to investors will be made through, and investors may submit their offers to buy Notes, using the information system Bloomberg or any other commonly used information systems. Following the publication of the Pricing Notice the Joint Lead Managers will offer the Notes upon request through banking institutions in Germany. Subscription rights for the Notes will not be issued. Therefore, there are no procedures for the exercise of any right of pre-emption, the negotiability of subscription rights and the treatment of subscription rights not exercised. Any investor who has submitted an order in relation to the Notes whose order is accepted will receive a confirmation by electronic mail, fax or through commonly used information systems relating to the respective allotment of Notes. Before an investor receives a confirmation from the Joint Lead Managers that its purchase order for the Notes has been accepted, the investor may reduce or withdraw its purchase orders. Any investor will receive relating to the respective allotment of the Notes a confirmation relating to the results of the offer. There is no minimum or maximum amount of Notes to be purchased. Investors may place offers to purchase Notes in any amount.

Confirmation in relation to an order and allotments as well as delivery of the Notes

Following the pricing of the Notes and confirmation which orders have been accepted and which amounts have been allotted to particular investors delivery and payment of the Notes will be made within five business days after the date of pricing of the Notes and the confirmation of the allotment to investors. The Notes will be delivered via book-entry through the Clearing System and its accountholding banks against payment of the Issue Price.

Charges and costs relating to the Offer

The Issuer will not charge any costs, expenses or taxes directly to any investor. Investors must inform themselves about any costs, expenses or taxes in connection with the purchase of Notes which are generally applicable in their respective country of residence, including any charges of their own depository banks in connection with the purchase or holding of securities.

Method of determination of the Issue Price and the Rate of Interest

The Rate of Interest and the Issue Price for the Notes will be determined at the time of pricing on the basis of a yield which is determined by adding a credit spread to the level of the Midswaps at the time of pricing. The pricing spread will be determined on the basis of the orders of the investors which are received by the Joint Lead Managers during the offer period. The level of the Midswaps will be determined as the average yield of the bid and ask prices of Interest-Swap Transactions ("**Midswaps**") with a maturity similar to the maturity of the Notes shown on the Reuters page ICAPEURO or on any other screen page which is conventionally used to price Eurobond transactions at the time of pricing. The resulting yield will be used to determine an Issue Price (which is expected to be less than par) and a Rate of Interest (which is expected to be a percentage figure which can be evenly divided by 1/8 of a full per cent. and which will be correspondingly higher if a higher Issue Price is determined and which will be correspondingly lower if a lower Issue Price is determined), all to correspond to the yield which reflects the level of the Midswaps and the pricing spread. In the event that the figures for the relevant Midswaps shall not be shown as set out above then the relevant figures shall be determined in a manner which banks and other institutional market participants apply at that time. The resulting figure will represent the yield of the Notes and such yield will be used to determine the Rate of Interest and the Issue Price.
